

Dave's "Best of the Best" list of Astrology Books

(Not our complete catalogue, just the best parts of it.)

I've often been asked for a list of my favorite astrology books, the ones I thought best. For years I resisted as I did not want to slight all the other authors of all the other books. Also, I didn't think my personal biases should get any more attention than they already do. But we live in a world that is graded (good - better - best) & those who make the rankings take it upon themselves, for better or worse. All of these books are **in print** and **in stock**. Be forewarned: These are demanding books.

You will find a version of this flyer at <http://www.AstroAmerica.com/TopTen.html>. There, each of these titles are linked to informative blurbs, price & other purchase information. **And now, the best of the best:**

Postscript: A great work is the result of great talent, combined with a certain element of luck. Gurdjieff said that talent was like salt. It must be handled skillfully in order to be effective. Scattered or misapplied & it is lost or the effect ruined. Few authors have the talent for a great book. Few ever will.

That said, there are many other good books. The books & authors above are mere springboards to further study. What do you want to know, what do you want to study, where do you want to go? The possibilities are endless.

This list will be updated from time to time.
