Yes, <u>You C</u>an

Líve a Dream Come True

You have to <u>learn</u>, to <u>earn</u>. Knowledge is the key to profits. The trade shown was made using knowledge of the chaotic behavior of markets, as taught in Dr. Hans Hannula's **Cash In On Chaos Course**. Isn't it time for you to learn to Cash In On Chaos?

Cash In On Chaos is a unique home study video course for traders. It is the only complete, accurate, stand alone course on Chaos in markets developed by a trader, for traders. In simple, clear, practical language, it teaches that markets are non-linear systems, what non-linear systems are, and what behaviors they exhibit. It teaches how these behaviors show up in charts, and how they form fractal patterns. It teaches fractal geometry, how it forms patterns, and how efficiency of price action relates to fractal dimension.

Then it teaches a unique pattern, the Hannula Market Fractal, which shows up in every freely traded market, on any scale. You learn the ten elements of the pattern, how to recognize it, and how to project it

forward in price and time. You learn what parts of the pattern offer the best trading opportunities, and techniques to trade the Hannula Market Fractal. A set of precision computer generated graphical overlays is provided for use in trading. Ongoing consultation is provided free of charge. Use it for day trading, position trading, or investing.

This course is being limited to no more than 999 traders, and sales are now well into three digits. Six hour video course, full workbook, and fractal overlays. *Invest in knowledge that can give you a genuine trading edge.* "Highly recommended." - Larry Jacobs, Trader's World

"...has real merit. I think this system could be traded with positive results." - Robert Flores, Stocks & Commodities. "We are able to see the fractals quite well. Thanks for sharing..." - SM

"I prefer that not too many people have these money making techniques." - LVH

"Fascinating approach to the markets. I was thoroughly impressed with your use of fractal analysis. It is a unique approach that makes a great deal of sense." - TM

"I learned several new things from Han's Cash In On Chaos course. I highly recommend it."-Larry Pesavento

Futures trading is extremely risky. You can lose more than your original investment. Past performance does not guarantee future results.

Yes, <u>You</u> Can Cash In On The Fractal Of Pí

Would you like to turn \$5000 into \$25000 in 90 days?

That can be done trading the S&P 500 with just one contract. The equity curve shown is my personal account for the 1st guarter 1997. Trading an average of twice per week, I managed to grow the account over 400 percent.

How was that done? It was done with knowledge, discipline, and patience. Knowledge was the key. Notice the sharp jumps in the equity curve. Those jumps occurred when I analyzed and correctly caught something I call a *chaos streak*. The second chart shows a streak.

Chaos streaks are those sharp moves that occur in all markets. and especially in the S&P 500. For years I have worked to determine when those streaks would occur. I wondered what caused the streaks and how they were related to other patterns that I knew - such as the Hannula Market Fractal, as taught in the Cash In On Chaos course.

In late 1996, I solved the Mystery of the Streaks. I have now created a course called **The Fractal of Pi**. It will teach **vou** the solution to the Mystery of the Streaks. This is a follow-on course to the Cash In On Chaos course, which you must take first. This is because the Fractal of Pi expands the Hannula Market Fractal pattern with its seven elements to the Fractal of Pi pattern with 18 elements. These additional elements locate the streaks within the Hannula Market Fractal. **They** give you a razor sharp trading edge.

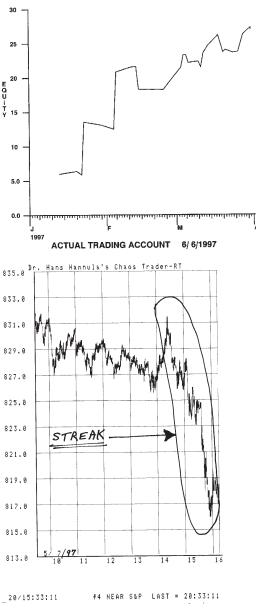

The course covers the energy fields in markets, the geometry of waves in energy fields, the development of the Fractal of Pi pattern, multiple examples, behaviors of the pattern, trading techniques for exploiting the fractal, and how to set up your charts to correctly use this amazing tool. Book with over 90 charts, and overlays.

The Fractal of Pi course is limited to those who have purchased the Cash In On Chaos course. That course is limited to 999 purchasers and sales are approaching that number. Your investment in this course is a modest \$720. If you have not taken the Cash In On Chaos course and wish to purchase both courses, you can purchase the Cash In On Chaos course for \$720 instead of the regular price of \$999. Further, the first 12 purchasers from this ad will receive 6 months of the Cash In On Chaos Newsletter absolutely free. That's \$120 value.

Isn't it time that you invested in your knowledge? If you want to Earn, you have to Learn. Learn to find the streaks. Cash In On the Fractal of Pi. Act now and save all regrets! - Dr. Hans Hannula

Dr. Hans Hannula, MicroMedia, 4224 E. 126th Ave., Thornton, CO 80241 voice 303-452-5566, fax 303-457-9871,email allarson@cashinonchaos.com http://moneytide.com or http://cashinonchaos.com/hans

Thank you for requesting information on *Cash In On Chaos.* I appreciate your interest in my work. My name is Dr. Hans Hannula. I am a commodity trading advisor and hold a PhD in Electrical and Computer Engineering. I have developed a unique approach to markets which is both scientifically accurate and profitable. I am a private trader and I trade this theory daily. I have put into practice what I have learned about markets. I offer courses to private traders to learn this new theory and to teach others to Cash In On Chaos.

The first three charts show my track record on our Position Trading Hotline, our S&P One-A-Day Trading Hotline, and my personal trading account. In 5 years our Position Trading Hotline is up 388%. Our S&P One-A-Day day trading program is up 455% in two years. My personal account is up 370% in two months. This shows the power of my scientific approach to the markets.

My market theories are based upon three topics: market astrophysics, chaos theory, and personal astrophysics. They are all concerned with energy flow. I believe that the universe is one intense energy field. I have learned that energy adds together according to the laws of harmony and resonance. When energy adds properly it creates matter, life, and everything we experience. Everything follows these energy laws: solar systems, nations, tribes, cultures, individuals, and markets. A consequence of these laws is that chaos exists as part of the natural order of things. Chaos is a behavior pattern of non-linear systems. Energy fields are non-linear systems. And markets are energy systems.

Profitable trading can, therefore, be based on understanding the behavior of these energy systems. I have worked long and hard to reach the point of scientific development where I understand these systems and how they work in markets. This approach is proven, scientifically sound, and <u>profitable</u>.

MOONTIDE ONE-A-DAY EQUITY

Here is a brief overview of my energy flow theory. Refer to the diagram at mid-page. As planets orbit the sun, they exert tidal forces upon the gases of the sun. These tidal forces cause swirling motions on the sun, creating sun spots, solar flares, coronal holes, and other energy events. All these effects combine to vary the amount of radiation that leaves the sun. That solar radiation is our sole source of energy. We are subject to every fluctuation in it.

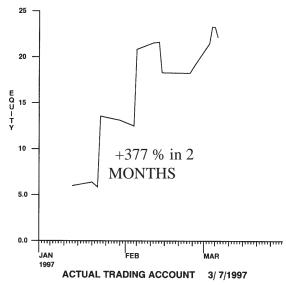

Solar radiation travels to the earth in two ways: as direct radiation, such as sunshine and radio waves, and as charged particles carried by the solar wind. This flow of charged particles forms a torrent of energy that blasts earth creating a bow wave and a wake, just as a boat going upstream would do. This bow shockwave forms a magnetopause between the

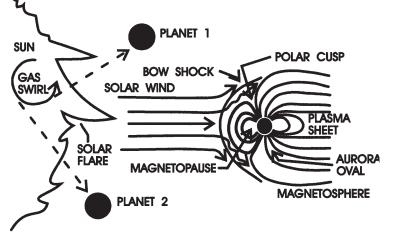

earth and the sun. It interacts with the earth's electromagnetic field, shaping and adding energy to it. At the poles, charged particles follow the magnetic lines of force into our atmosphere. This creates a charged layer called the ionosphere.

As this solar wind passes earth, it shapes our magnetosphere into a teardrop shaped envelope of trapped charged particles. As solar radiation varies so does the earth's magnetic field, atmospheric ionization, and temperature. Scientists have tracked down a host of relationships between these events and a variety of earthly phenomena such as weather, climate, crime rates, plant growth rates, frequency of thunder storms, blood Ph levels, psychiatric emergencies, and many others.

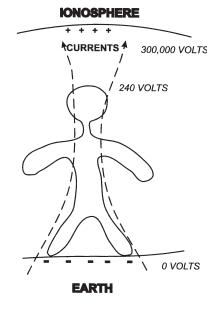

As part of this activity the solar wind charges our ionosphere to a voltage of approximately +300,000 volts. This charged layer above the earth represents the positive end of a battery. When you stand on the ground you are standing on the negative end of this battery. This is the earth's electric field that we all live in. When you stand erect, it places a voltage on the top of your head of about 240 volts. That is the same voltage as used by your oven element. Fortunately for us, this is not a high current power source. Otherwise, we would fry.

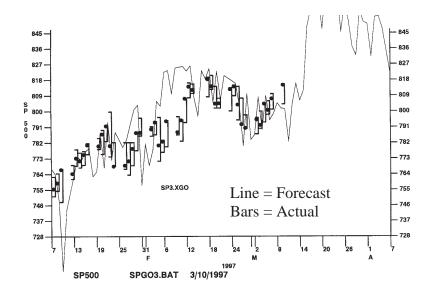

We are affected by this field. This voltage causes currents to flow through us as we live on earth. These currents are approximately 2000 times as strong as the biological currents that run our brain,

SOLAR STIRRING FORCE

our nervous system, our muscles, and our organs. All of our body's electro-chemical systems are subject to the fluctuations in these currents.

The ionosphere and the charges on it form a very dynamic system. Events such as solar flares can cause rapid and large changes in this voltage. Our biological circuits feel these changes. These changes can affect all our biological processes including our emotional moods. Scientific studies have shown that changes in ionization cause people to feel giddy to gloomy. These moods show up in the markets.

It is well accepted that markets move in response to fundamental forces and investor psychology. A major finding of my work is that investor psychology is driven by the physical energy system. Those emotional rallies and declines are controlled by the currents that run through us. We call those currents emotions.

I have related the timing and price level of market turns to these currents. I have exhaustively verified every link in this chain of cause and effect. I have developed a solid mathematical knowledge of how this energy flow controls pattern, price, and time in markets.

While it is not possible in a chaotic system to make perfect predictions, I have been able to formulate a computer program called XGO which predicts markets with between 60% and 90% accuracy. Look at the chart at the top of the page. This S&P forecast has been running about 80% accurate over the past two months. *It was computed over one year ago, and used no price data!* It is simply a computation of the energy coming into the S&P. These forecasts can be made for any market, *for any time in the future.* This is a unique scientific technology.

I have also learned how these energy systems affect individual traders as well. I have found ways to increase a trader's energy, and reduce their sensitivity to the external fields. That's part of my trading approach. One can improve trading results by managing one's own energy system.

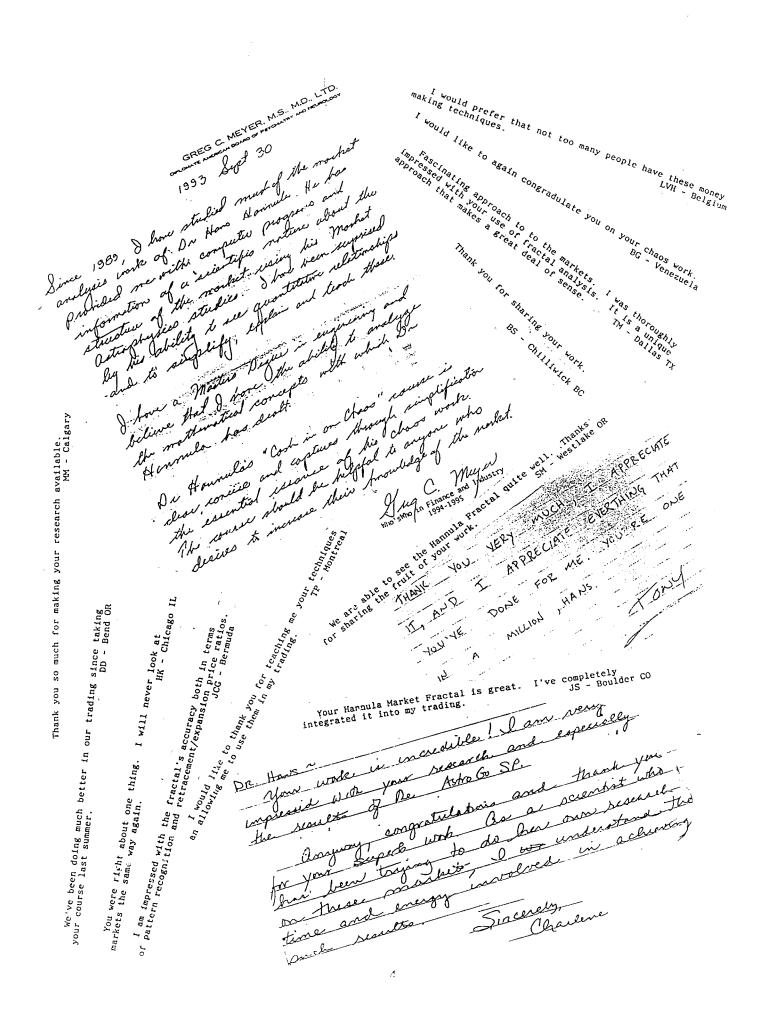

XGO is but one example of what I offer to private traders. A variety of products are summarized briefly in the following literature. More detailed descriptions can be found on our web site at **http://wwwcashinonchaos.com/hans.**

I am a professional teacher, trader, and technologist. I am not a high pressure salesman. I have good stuff and I believe if you want it and deserve it, you will come and get it.

I have found that to succeed in the markets, you have to understand markets and understand yourself. I have reduced both of those topics to science. If you seriously want to *learn to earn*, I can help you. After looking over the enclosed literature, if you have any questions please call me, fax me, or send me e-mail.

Happy Trading!

The Cash In On Chaos Catalog

Our goal is to provide you with everything you need to *Learn to Earn.* You can master the markets and control your own future. You Can *Cash in On Chaos*. Items are roughly in the suggested order for learning. *Background Material*

Your Electric Life, Science for a New Age

Whether you realize it or not, you are being strongly influenced by a very powerful electrical force - the earth's electric field. This field produces currents through your body that are 250,000 times as strong as the currents that run your brain. Recognition of this fact, research, and experimentation have led former Bell Labs engineer and scientist Al Larson to a series of insights into many previously unexplained phenomena. His findings cover a wide range of topics, such as dowsing, the human aura, consciousness, bio-circuits, Feng Shui, natal astrology, stock markets, remote viewing, energy field medicine, de ja vu, dreams, and religious experiences. His own discovery of *sudden impulses* shows how we are all connected by the field in a *Cosmic Internet*. Al provides a rational explanation of how these phenomena work through the earth's electric field, along with guidance of how this knowledge can be used to improve your own life. Do not miss this clear, concise, convincing explanation of how things work.\$18 + \$2 Shipping/Handling.......YEL...\$20

Market AstroPhysics and Chaos

A book. Learn about the Chaos Clamshell and what causes it and other chaotic events. Contains reprints of all of Han's published articles. Capitalizing on Chaos with Market AstroPhysics ,In Search of the Cause of Cycles, In Search of the Cause of the Crash of 1987, Using Gann with Market AstroPhysics, Cycles Without Tears, In Search of Truly Scientific Correlations, Trade Like a Cheetah, Tomorrow's Wall Street Journal, Making Money With Chaos, Cycles Make Easy, A Lunar Chaos Theory, Trading the Seasonal Cycle, Trading the Eclipse Cycle, Cashing in on Natural Energy, Cashing In On XGO, Why Johnny Can't Trade, The Tachyon Field in Stocks and Commodities, and more.

Tools for Traders

The XGO Software

Individual XGO Charts

Past year and next year of XGO energy function for any market or person. Five pages give great detail. A low cost way to watch XGO in action. Requires date of birth for individual, and date of first trade for market. We have most market data for US markets. Also available as ASCII data file for Excel.......XGOCHART...\$36

MoonTide Data Subscription

One minute energy wave forecast for the S&P 500. Gives day traders a unique advantage. Data files furnished three months at a time. Formats available for loading into popular trading software. Limited to 120

MoonTide Software

Program computes the electric field waves due to the Moon's effect on the earth's electric field. This energy function is a forecast for price action that is between 60 and 90 percent accurate. Program produces one minute ASCII data files that can be read into most popular trading programs. Uses the date of first trade. Perfect tool for daytraders. Computes forecasts without use of price data for any date......MTSW...\$3600

Chaos Trader RT

Hans' online real time trading system. Uses Bonneville data feed. Runs on Windows 95 in two DOS windows. Presents stable screens for recognizing chaos patterns. Implements the unique Chaos Map. Fully programmable with built in scripting. Zero Delay filters, Polarized Fractal Efficiency, Fractal Moving Average, and other unique tools found nowhere else. This is the tool to use to trade the S&P. Must have taken the Cash In On Chaos Course. Very desirable that you have taken the Fractal of Pi, Face of God, and Harmonics of Heaven course so you will understand what the system is showing you. Overlays the MoonTide energy forecast. As seen on the weekly Chaos Clinic. By acceptance only...........CTRT... \$3600

Energy Field Products

Energy Charging Kit

If you want to trade well, you need to manage you own energy. It is possible to draw additional energy from the universe. You already draw energy from the universe when you sleep. We have figured out how sleep works to recharge you. Using a discovery by Leon Eeman, an Englishman, we have created a package that includes a biocircuit, an affirmation audio tape, and an instructional video tape. This charging kit is good for everyone. Increase your energy, balance your Ki, and Live a Charged Life!......CHARKIT....\$72

Concentration Headband

You can protect yourself from the external fluctations in the earth's electromagnetic field the same way that the earth protects our atmosphere from the solar wind - with a local electromagetic field. The concentration headband uses a magnetic strip to increase the magnetic flux in your brain. Not only does that shield you, but it strenthens your own positive thoughts. The secret is that the magnet must be turned the right way. Otherwise, they can do serious harm. Our headbands are made correctly. If you wear them right side up, your mental concentration will be increased. They are completely passive. To order one you must take a cloth tape measure and measure your head where your want to wear it. These headbands are great for meditation, during exams, or for anything you need to do that requires good thinking - like commodity trading. Requires headsize in in. or cm. Measure around your head where your hat brim would sit....CONHB.......\$36

Energy Traps

Our world is electro-polluted. The electrical equipment around you generates negative fields. Don't believe the government's claim that there is no danger. The effects start as lack of concentration, fatigue, and irritability. Over time this can lead to illnesses of various types. Scores of scientific studies show harmful effects from electronic and electrical radiation. Protect yourself. Computer screens, laser printers, copiers, and florescent lights are especailly bad. Our energy traps are simple passive devices that trap the energy and dissipate it. In the process, they turn a device into a positive energy source. Computer screens go from -130 to +100 EUs, laser printers from -200 to +170, copiers from -300 to +200, and florescent lights from -130 to +105. These devices are one inch square and stick on the equipment with a peel off adhesive. We sell the energy field traps in sets of four. You need 4 for each computer screen, small copier, small TV, or laser printer. Large copiers and TV's need 6 to 8. Inkjet printers, VCRs, tape recorders, etc. need one. Two 40 watt florescent bulbs need 6. Just figure out how many you need and round up to the nearest four. Sold
